ABOUT ME

I graduated with a degree in Electrical and Electronics Engineering and developed a strong passion for software development. Focusing on frontend technologies, I have worked on various projects using modern tools such as React.js and React Native for both web and mobile app development. I am a quick learner, adaptable in team environments, and highly motivated to continue improving my skills in both frontend and backend development.

INTERN

FATİH MUNICIPALITY 2022 - 2023

INFORMATION TECHNOLOGY DEPARTMENT

During the internship, I worked on web development and participated in projects using HTML, CSS, and JavaScript. I gained experience in creating user-friendly interfaces and frontend development processes.

FATİH MUNICIPALITY 2023 - 2024

INFORMATION TECHNOLOGY DEPARTMENT

During my 1-month internship at the Information Technology Department of Fatih Municipality, I worked on web development projects using HTML, CSS, JavaScript, and React.js. I gained hands-on experience in frontend development and user interface design, and developed my teamwork and problem-solving skills through active participation in various projects.

ISTANBUL BÜYÜK HAVALIMANI (IGA)

IT Department | Digital Business Applications Development Unit
Long-Term Internship 2024 - 2025

During the internship, I focused on mobile application development. The main technologies I used included React Native and Swift. Additionally, I gained practical experience in mobile app design and development, while enhancing my teamwork and project management skills.
